

SAHIL JAMADAR

Pune, Maharashtra, India

+91 9322395700 | sahiljamadar916@gmail.com | GitHub: <https://github.com/Sahil786-cybe>

PROFESSIONAL SUMMARY

Results-oriented Computer Science Engineer with hands-on experience in Python Full Stack Development, Flutter application development, Data Analytics, Machine Learning, Artificial Intelligence, SQL, and REST APIs. Developing cross-platform mobile applications with Flutter and Dart, with understanding of widgets, layouts, state management, navigation, forms, API integration, JSON, asynchronous programming, and debugging. Experienced in building full-stack and data-driven applications and teaching programming, AI, and emerging technologies. Strong problem-solving, communication, and project-based development skills.

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science

Dr. D. Y. Patil Pratishthan's Engineering College, Salokhenagar | 2025 | CGPA: 7.54

HSC (Science) – Maharashtra State Board | 2020 | 62.6%

SSC – Maharashtra State Board | 2018 | 87.6%

TECHNICAL SKILLS

- **Programming:** Python, Java, Dart, SQL
- **Mobile Development:** Flutter, Dart, Android Studio
- **Frontend:** HTML, CSS, Bootstrap, React.js
- **Backend:** Django, Flask, FastAPI, Node.js, REST APIs
- **Databases:** MySQL, PostgreSQL
- **Data & Analytics:** Pandas, NumPy, Matplotlib, Power BI, Advanced Excel
- **Core Concepts:** OOP, DSA, JSON, API Integration
- **Tools:** Git, GitHub, VS Code, Google Colab

PROFESSIONAL EXPERIENCE

Robotics & AI Trainer | STEMLearn.AI

Mar 2026 – Present

- Conduct training programs on Artificial Intelligence, Robotics, Python Programming, and Emerging Technologies.
- Develop hands-on AI, IoT, and Robotics projects for students.
- Mentor students in Python, Machine Learning, Data Analysis, and Problem Solving.
- Collaborate with educational institutions to implement AI-driven learning programs.
- Design technical content, practical assignments, and project-based learning modules.

Teaching Faculty & Training & Placement Coordinator

Adarsh Institute of Technology and Research Centre | Aug 2025 – March 2026

- Delivered training sessions on Python, SQL, Data Analytics, Power BI, and Career Development.
- Guided students in developing Data Analytics, Machine Learning, and Web Development projects.
- Analyzed placement and student performance data to generate actionable reports.
- Coordinated with recruiters, faculty members, and students to improve placement outcomes.
- Created technical documentation, training materials, and project guidelines.

Python Full Stack Intern

The Kiran Academy | Feb 2025 – Jul 2025

- Developed full-stack web applications using Python, Django, HTML, CSS, JavaScript, and PostgreSQL.
- Built RESTful APIs and implemented backend business logic.
- Designed and optimized database schemas and SQL queries.
- Performed testing, debugging, and application performance optimization.
- Worked in Agile development environments and collaborated with development teams.

Data Analytics Intern

NexGen Analytix | Feb 2025 – Jun 2025

- Performed data cleaning, preprocessing, and analysis using Python, SQL, Pandas, and NumPy.
- Created interactive dashboards using Power BI and Tableau.
- Conducted Exploratory Data Analysis (EDA) to identify business trends and patterns.
- Generated reports and visualizations to support business decision-making.
- Collaborated with cross-functional teams to deliver data-driven insights.

Data Science Intern

YBI Foundation | Jun 2024 – Aug 2024

- Developed Machine Learning models for classification and forecasting tasks.
- Performed feature engineering, data preprocessing, and model evaluation.
- Utilized Scikit-Learn, Pandas, and NumPy for predictive analytics.
- Built data visualizations and analytical reports to communicate insights.
- Improved model performance through hyperparameter tuning and validation.

PROJECTS

AI Interview Copilot (GenAI Project)

Tech Stack: Python, FastAPI, React.js, OpenAI API, PostgreSQL

- Developed an AI-powered interview assistant capable of generating role-specific responses in real time.
- Integrated resume-based context understanding for personalized answer generation.
- Built scalable frontend and backend architecture using React.js and FastAPI.
- Implemented API-driven workflows using Generative AI and prompt engineering techniques.
- Enhanced interview preparation through intelligent and contextual AI responses.

Financial Market Sentiment Analysis

Tech Stack: Python, NLP, Pandas, Machine Learning

- Built a sentiment analysis system for financial news and market data.
- Applied Natural Language Processing (NLP) techniques to extract sentiment trends.
- Analyzed financial market sentiment to support investment decision-making.
- Generated predictive insights and visual reports using Python libraries.

Customer Purchase Behavior & Sales Performance Analysis

Tech Stack: Python, SQL, Power BI, Pandas

- Performed data cleaning, transformation, and exploratory data analysis.
- Built predictive models to identify customer purchasing patterns and trends.
- Developed interactive dashboards and reports for business stakeholders.
- Generated actionable recommendations to improve sales performance.

Sales Performance Analysis & Forecasting

Tech Stack: Python, Power BI, Pandas, NumPy

- Analyzed historical sales data and business KPIs.
- Developed forecasting models to predict future sales trends.
- Created visual dashboards to monitor business performance.
- Provided strategic recommendations for revenue growth and operational improvement.

Shaurya Laboratory Website (Freelance Project)

Tech Stack: HTML, CSS, JavaScript, Python, PostgreSQL

- Gathered client requirements and designed a professional pathology laboratory website.
- Developed responsive user interfaces and optimized user experience.
- Implemented service pages, inquiry forms, and contact functionalities.
- Successfully delivered the project within client timelines and requirements.

JARVIS AI Virtual Assistant

Tech Stack: Python, FastAPI, OpenAI API, Speech Recognition

- Developed an AI-powered virtual assistant inspired by JARVIS for voice-based interaction and task automation.
- Integrated AI models to understand user queries and generate intelligent responses.
- Implemented speech-to-text and text-to-speech functionalities for natural communication.
- Designed a scalable architecture for future automation and smart assistant features.

Skills: Python, Generative AI, NLP, FastAPI, API Integration, Automation.

Flutter Mobile Application | Flutter, Dart

- Developed a cross-platform mobile application using **Flutter and Dart**.
- Built responsive UI using reusable **Flutter widgets** and Material UI.
- Implemented **navigation, forms, validation, and state management**.
- Tested and debugged the application using **VS Code**.

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation – Forage (2026) Completed practical industry tasks in **Data Analysis** and **Forensic Technology**.
- Python for Data Science – IBM Cognitive Class
- Data Science & Machine Learning – YBI Foundation
- Excel for Data Analytics – Alison
- Web Development Bootcamp – Self Learning
